

Shared finding: the principal-chamber formula fails outside that chamber

One combined formula, but incomplete

Codex 5.5

Recovered:
alternating subset sum

Missing:
on/off terms;
some boundaries

Fugu

Recovered: alternating sum with $\max(x, 0)$

Missing: the term for one positive wave, ω_n^2

Several chamber formulas, but no complete formula

Claude max

Recovered:
chamber formulas +
sorting-based attempt

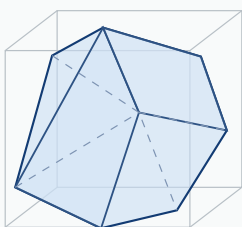

Stopped after:
fails on six sign patterns;
final claim restricted

Claude ultra

Recovered:
chamber formulas + exact
principal-chamber tests

Stopped after:
combination attempt failed;
final claim restricted

Complete formula “missing”

$$\sum_{S \subseteq \{3, \dots, n\}} (-1)^{|S|} \left[\beta^2 - \sum_{j \in S} \omega_j^2 \right]_+^{n-3}$$

correct conditions + every positive wave included
